Team 8's Meeting Log

Meeting # 1
Date: Feb 19
Location: Just Outside Spahr Library
Start: 8:54 AM
End: 9:39 AM

Were tasks completed?
- N/A

What was discussed?
- Forking Team 3's project and preparing for work.
- Initial look at Team 3's project.
- Noted lack of documentation and modularity in some places.

What will everyone do?
- Everyone: Evaluate Team 3's project
- Sherman: Get google documents ready.
- William: Clean up repository.

Team 8's Meeting Log

Meeting # 2
Date: Feb 21
Location: EECS 448 Class/Just Outside Spahr Library
Start: 8:36 AM
End: 9:38 AM

Were tasks completed?
- Evaluated Team 3's project.
- Created google documents.

What was discussed?
- Discussion of what was already there and what improve on.
- Wrote in product backlog about what to do.
- The format of the event information discovered and discussed:

[CURRENT STRUCTURE OF EVENT INFORMATION]
<event id>, <event name>, <date>, <# of time blocks>,   <time block>, <# of attendees (time block)>,... (Continues as needed) <# of attendees (entire event)>, <attendees>
[PROPOSED STRUCTURE OF EVENT INFORMATION] [TBD]

What will everyone do?
- Wait until next meeting at 12:00 PM today.

Team 8's Meeting Log

Meeting # 3
Date: Feb 21
Location: LEEP 2 Atrium
Start: 12:06 PM
End: 1:36 PM

Were tasks completed?
- N/A

What was discussed?
- Large lack of modularity between File IO and UI noted.
  - Infeasible "minute" file editing noted.
- The format of the event information storage discussed:

[CURRENT STRUCTURE OF EVENT INFORMATION]
(Note: all of this is one line; two dashes indicate possible repetition of patterns)
<event id>, <event name>, <date>, <# of time blocks>,
--<time block>, <# of attendees (time block)>,... (Continues as needed)
<# of attendees (entire event)>, <attendees>

[PROPOSED STRUCTURE OF EVENT INFORMATION #1]
(Note: all of this is one line; two dashes indicate possible repetition of patterns)
<event id>, <event name>,<# of dates>,...
--<date>, <# of time blocks>,...
  --<time block>, <# of attendees (time block)>,...
    --<attendee names>,... (Continues as needed)
<# of attendees (entire event)>,...
--<attendees>,...
<# of tasks>,...
--<task taken (T/F)>, <task name>, <task who's doing it>... (Continues as needed)

[PROPOSED STRUCTURE OF EVENT INFORMATION #2]
(Note: Data is separated into various files)

(In Events File) [Note: Event IDs should be unique]
<event id> <event name> <event creator>
(In Dates File) [Note: Multiple lines can have the same event ID]
<event id> <date> <comma separated times>
(In Tasks File) [Note: Multiple lines can have the same event ID]
<event id> <task taken (T/F)>, <task name>, <task who's doing it>

- Team agrees on structure #2.
- Task allocation.

What will everyone do?
- Sherman: Provide aid to Xianye/Doug as needed.
- William: IO.hpp (Breaking Data Structure Down Into the Three Files (Refactoring))
- Xianye: Events.hpp (Multi-Day Scheduling (from POV of Admin) AND Multi-Day Scheduling (from POV of User))
- Doug: Events.hpp (Task List Creation by Admin **AND** Task List Attending by User)

Team 8's Meeting Log

Meeting # 4
Date: Feb 23
Location: Just Outside Spahr Library
Start: 8:56 AM
End: 9:02 AM

Were tasks completed?
- Nothing was done yet.

What was discussed?
- Projection of work schedule over the weekend.
- Discussion of task trading.
    - Doug gives Sherman permission to start work on Task List in anticipation of having a busy weekend.
- IO discussion.
    - The IO currently takes in one huge string.
    - The IO will likely be broken down.
- Meeting ended early. Everyone is busy with other things.

What will everyone do?
- Sherman: Provide aid to Xianye/Doug as needed.
    - Starting work on Doug's work over the weekend.
- William: IO.hpp (Breaking Data Structure Down Into the Three Files (Refactoring))
- Xianye: Events.hpp (Multi-Day Scheduling (from POV of Admin) AND Multi-Day Scheduling (from POV of User))
- Doug: Events.hpp (Task List Creation by Admin **AND** Task List Attending by User)

Team 8's Meeting Log

Meeting # 5
Date: Feb 26
Location: EECS448 Class / Just Outside Spahr Library
Start: 8:36 AM
End: 10:00 AM

Were tasks completed?
- Sherman began development on tasks from Admin POV and from User POV.
- Doug: Too busy to continue work.
- Xianye began work on Multiple dates.
- William unable to fix current file IO.

What was discussed?
- File IO refactoring issues.
- Current work being reviewed and put together and debugged.

What will everyone do?
- Sherman: Continue work and help others (specifically working on the Admin side of Multidates)
- Xianye: Continue work on multi-dates (specifically on the User side of Multdates).
- Doug: Catch up on work and notify of anything else that needs to be done.
- William: Complete work by Wednesday.

Team 8's Meeting Log

Meeting # 6
Date: Feb 26
Location: EECS448 Class / Just Outside Spahr Library
Start: 8:43 AM
End: 9:45 AM

Were tasks completed?
- Sherman merged current stuff on File IO branch with existing branches.
- William refactored file IO. File Input complete, but outputting is still under work.
- Douglas and Xianye are waiting on the completion of file IO.

What was discussed?
- Current issues with experimental branch and File IO issues.
- Refactoring issues discussed.

What will everyone do?
- Xianye: Modularize Events.hpp as needed.
- Doug: Modularize Events.hpp as needed.
- Sherman: Help merge everything together as needed AND static-ify variables in Events.hpp.
- William: Complete File IO.

Team 8's Meeting Log

Meeting # 7
Date: Feb 26
Location: Just Outside Spahr Library
Start: 12:00 PM
End: 12:52 PM

NOTE: Mini-Meeting between Sherman and Doug

Were tasks completed?
- N/A

What was discussed?
- Continued work as needed.
- Small details regarding refactoring ideas discussed.

What will everyone do?
- Same as meeting #6.

Team 8's Meeting Log

Meeting # 8
Date: Mar 2
Location: Anschutz Library
Start: 3:24 PM
End: 4:31 PM

NOTE: Mini-Meeting between Sherman and William

Were tasks completed?
- William has created the skeleton of File IO.
- Sherman has begun merging of branches and current progress.

What was discussed?
- File IO status updates.
- Extend the menu to allow elaboration.
    - Specifically, the event listing will be the "basic" information (Event name and creator) and schedule, tasks, and dates will need to be inspected in the menu.
        - Get task method will return pairs <task name, assignee>
- Exploration of UI extension:

OLD
-- Event 6 --   ID: Name: Date: Total Attendees: Attendees: Slots Available:
NEW
-- Name --   ID: Creator: Date:
(Inspect event)

Dates:
  List of Date
   List of Times
    List of Attendees
 Tasks:
  List of Tasks with Assignees

What will everyone do?
- Sherman begin updating the menu in preparation of File IO completion.
- William finish file IO.
- Douglas and Xianye will continue what they are doing.

Team 8's Meeting Log

Meeting # 9
Date: Mar 5
Location: Just Outside Spahr Library
Start: 8:56 AM
End: 9:50 AM

Were tasks completed?
- ● Product completed and ready for stress testing.

What was discussed?
- ● Project testing and presentation preparation.

What will everyone do?
- ● N/A
